

The Crown & Kettle

Crown & Kettle is a Grade 2 listed building in Ancoats known for its Cask Ales and grand ceiling.

There is no formal staging area and we have very limited lighting rig. We can provide you with a PA system, 3 microphones and mic stands at present, but our site-holding may change in the coming months.

We have an in-house sound engineer who would be available to you for a small fee, but I am happy to offer you use of the building for free.

The pub itself is by no means a traditional performance space, but could lend itself to a really interesting piece of theatre - in particular a site-specific performance. I would invite all artists to firstly come in, have a look around and contact me with any questions they might have.

Really looking forward to being part of this and supporting local talent!
